V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	2-6, 8, 9	YES
	Claims	1, 7	NO
Inventive step (IS)	Claims	3, 6, 9	YES
	Claims	1, 2, 4, 5, 7, 8	NO
Industrial applicability (IA)	Claims	1-9	YES
	Claims		NO

2. Citations and explanations

Document 1: Microfilm of the specification and drawings annexed to the Japanese Utility Model Application No. 97989/1990 (Laid-open No. 55770/1992) (Nissin Electric Co., Ltd.), 13 May 1992

Document 2: JP 2000-348807 A (Sumitomo Wiring Systems, Ltd.), 15 December 2000

Document 3: JP 7-24371 A (Yazaki Corporation), 27 January 1995

The inventions set forth in claims 1 and 7 lack novelty in the light of document 1 cited in the international search report. The "mark indicating the terminal metal fitting housed by the corresponding terminal storage chamber" set forth in claims 1 and 7 is disclosed in document 1 (page 5, line 20 to page 6, line 3).

The inventions set forth in claims 2, 5 and 8 do not involve an inventive step in the light of document 1 and document 2 cited in the international search report. Document 2 (paragraph [0003], [fig. 6]) indicates that a mark (4) is made on the end face of the housing. The inventions set forth in document 1 and document 2 address

the same technical issue of "preventing incorrect insertion of terminals", therefore it would be easy for a person skilled in the art to conceive of applying the identification mark (15) set forth in document 1 to the end face of the housing.

The invention set forth in claim 4 does not involve an inventive step in the light of document 1 and document 3 cited in the international search report. Document 3 indicates that a coloring material is sprayed to form a mark. The inventions set forth in document 1 and document 3 address the same technical issue of "forming a mark", therefore it would be easy for a person skilled in the art to conceive of spraying a coloring material to form the identification mark (15) set forth in document 1.

The inventions set forth in claims 3, 6 and 9 involve an inventive step in relation to the documents cited in the international search report. None of the documents cited in the international search report indicates that a mark is provided at the edge closest to the opening on the inner surface of the terminal storage chamber, and said feature would not be obvious to a person skilled in the art.
